Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding Claim 1, and all claims that depend therefrom (Claims 1-6), it is unclear/vague what type of VSEL is being claimed. The written description of the invention clearly specifies a tunable VCSEL. In addition, the Applicant has not particularly pointed out in the claims the necessary structural elements and cooperative relationships of the subject matter regarded as the invention. Specifically, the optical elements of Fig.1 that enable a tunable VCSEL and fiber amplifier to be optically pumped by a common pump source.

Regarding Claim 7, and all claims that depend therefrom (Claim 8), it is unclear/vague what type of VSEL is being claimed. The written description of the invention clearly specifies a tunable VCSEL. In addition, the Applicant has not particularly pointed out in the claims the necessary structural elements and cooperative relationships of the subject matter regarded as the invention.

In addition, it is unclear/vague where in the specification the Applicant is referring to in regards to 1) "means for directing said pump laser beam into said VCSEL..." and 2) "means for directing said VCSEL laser beam into said optical gain fiber..." Furthermore,

it is not clear if this means for clause applies to “(b) injecting said pump laser beam into said optical gain fiber....” This claim would be clearer if indentations were used to clearly indicate elements/subelements.

Regarding Claim 8, it is unclear what structure “means for” on page, 19, line5 refers to, “means for” on page 19, line 8 and “means for” on page 19, line 17.

Regarding Claim 9, and all claims that depend therefrom (Claims 10-14), it is unclear/vague what type of VSEL is being claimed. The written description of the invention clearly specifies a tunable VCSEL. In addition, it is unclear what structure “means for” on page 20, line 4 refers to, and “means for” on page 20, line 11.

Regarding Claim 15, and all claims that depend therefrom (Claim 16), it is unclear/vague what type of VSEL is being claimed. The written description of the invention clearly specifies a tunable VCSEL. In addition, “being adapted to” is indefinite; this language makes it unclear how the WDM relates to items (a) and (b) of the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 2828

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Hsu et al. (US 6263002).

Regarding Claims 1 and 7, and all claims that depend therefrom (Claims 2-6 and 8-), Hsu et al. discloses a fiber-semiconductor laser source comprising an optically pumped VCSEL (col. 12, lines 44-60) and a fiber amplifier (col. 12, lines 44-60) from the laser output of said VCSEL, which are optically pumped by a common optical source.

Conclusion

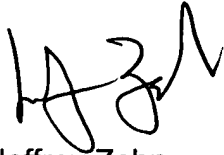

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Walker et al. (US 6445495).
